Yinbo Wang

School of Statistics – Renmin University of China – Beijing
+86 186 1187 0959 • audiofool@ruc.edu.cn • audiofool.blog

Education

Renmin University of China **Beijing**
Bachelor of Science in Statistics, GPA: 3.72/4.0 *2023–Present*
Special Program: Elite Class in Statistics and Data Science (Top 20% admitted)

Research Interests

Video and Audio Generation: Sounding Video Synthesis, Music Generation

Multimodal Generative Models: Diffusion Models, Flow Matching, Cross-modal Learning

Publications

2026: Xihua Wang*, **Yinbo Wang***, Jingchao Zhang*, Ruihua Song. **Meric: A Unified Framework for Multimodal Music Generation and Retrieval via Representation Space Anchoring**. *Submitted to ECCV 2026* (*Equal contribution). [Demo]

2026: Xin Cheng, Xihua Wang, Ying Ba, Yuyue Wang, Kaisi Guan, **Yinbo Wang**, Wenpu Li, Ruihua Song. **SyncDPO: Enhancing Fine-Grained Audio-Visual Synchronization via Preference Learning**. *Submitted to ECCV 2026.*

Research Experience

AIMind **Renmin University of China**
Research Assistant, Advisor: Prof. Ruihua Song *July 2025–Present*

- Led the development of **Meric**, a unified framework for art-centric multimodal music generation (image/video → music). Responsible for dataset construction, model architecture design, and end-to-end training with flow matching as the core generation method.
- Contributed to an audio-visual joint video generation project, responsible for dataset construction and curation.

GSAI-ML **Renmin University of China**
Visiting Student, Advisor: Prof. Chongxuan Li *Nov 2024–July 2025*

- Studied the theoretical foundations and recent advances in diffusion models and flow matching for generative modeling.
- Investigated video generation pipelines and architectures based on diffusion frameworks.

GeWu-Lab **Renmin University of China**
Research Assistant, Advisor: Prof. Di Hu *Jul 2024–Oct 2024*

- Developed methods for joint audio-visual video editing, enabling synchronized modification of visual and audio content while preserving cross-modal consistency.

Projects

MUSE: Unified music generation from text, image, and video via two-stage flow matching

WeaveWave: Multimodal music generation from text, image, and video via LLM-conditioned synthesis

Data-Side-of-the-Moon: Unsupervised musical structure discovery via convolutional autoencoders

DSP Project: Audio DSP from scratch (FFT, STFT, mel, MFCC) with pretrained model comparison on ESC-50

Technical Skills

Languages: Python, C/C++, LaTeX

Frameworks: PyTorch, HuggingFace Transformers/Diffusers, torchaudio/librosa

Tools: Linux, Git, Distributed Training, Wandb

Relevant Coursework

Mathematics: Mathematical Analysis, Advanced Algebra, Probability Theory, Mathematical Statistics, Real Analysis, Optimization, Regression Analysis, Stochastic Processes, Nonparametric Statistics

Computer Science: C/C++ Programming, Python Programming and Artificial Intelligence, Data Structure and Algorithm, Comprehensive Design in Artificial Intelligence, Big Data Parallel Computing, Digital Signal Processing

Machine Learning: Machine Learning, Deep Learning, Reinforcement Learning, Probabilistic Graphical Models

Honors and Awards

Scholarship: Awarded Excellence in Study Scholarship (top 20%)

Recognition: Beijing Merit Student (San Hao)

Languages

English: **TOEFL iBT:** 100/120 (CEFR: C1) | **5.0/6.0** under the 2026 TOEFL band scoring system

Hobbies & Life Goals

Music: Art-Rock Enthusiast (huge Pink Floyd fan); 70s and 80s music; Playing piano and guitar

Photography: Landscape Photography

Aspirations: Go skydiving by 27, fly an airplane before turning 30, and walk on the moon by 2073.
